Recent Advances in the Management of Dental Caries

Message from the Guest Editor

Dealing with disease caries and carious lesions is common in dentistry. However, understanding the disease process, the clinical appearance of caries, the prevalence of the disease, and their treatment has changed significantly in recent years. This Special Issue aims to find the best way to detect carious lesions, as well as how the necessary treatment can be correctly assessed? In addition, it is crucial to evaluate modern therapeutic procedures or ways to intervene directly in the oral ecosystem. Micro- or meta-bolome imbalances and pathological conditions could be avoided from the very beginning, and the progression of existing carious lesions could be prevented. Therefore, of particular interest in this Special Issue is research studies dealing with the etiology and pathogenesis of the caries process or caries diagnostics. In addition, all papers dealing with options for the treatment of the disease or its lesions are suitable.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
