Current Perspectives on the Treatment of Obstructive Sleep Apnea—Part II

Message from the Guest Editor

Obstructive sleep apnea (OSA) is a common disorder with strong associations with cardiovascular, cerebrovascular, metabolic, and cognitive consequences. Continuous positive airway pressure (CPAP) treatment is the first-line therapy for adults with OSA who are symptomatic. However, many individuals with comorbidities do not report symptoms associated with OSA, and adherence to CPAP is poor, especially in individuals with the non-sleepy OSA phenotype. This Special Issue aims to continue updating the current perspectives on the treatment of OSA in order to highlight multidisciplinary approaches, personalized treatment strategies, and identification of the predictors of response to treatment, both in the general population and in clinical cohorts. We particularly encourage the submission of papers that focus on drowsy driving and cost-benefit aspects of OSA treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
