

Special Issue

Geriatric Fracture: Current Treatment and Future Options

Message from the Guest Editors

The age group of older adults is growing rapidly worldwide and is expected to continue to grow. Geriatric traumatology is a rapidly growing subspecialty within orthopedic trauma surgery, and there is increasing demand for scientific studies in this field. Medical decision-making for frail geriatric fracture patients is complex, especially toward the end of life. If we are to provide patient centered for older adults with fractures, there is need for more insight into treatment options and patient (reported) outcomes, as well as costs. These insights are vital for the advancement of data-driven and value-based healthcare in this field. For this Special Issue, we welcome authors to submit papers on current treatment options (both operative and non-operative) and patient outcomes for geriatric patients with fractures. We highly recommend research to be conducted by a multidisciplinary team. Additionally, we seek to promote inclusiveness for patients with cognitive impairment. These patients are often selectively excluded from studies in this field, while they might benefit most from them. We look forward to your submissions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
