

Special Issue

Better Management of Heart Failure: Contemporary Strategy and Future Perspective

Message from the Guest Editors

Heart failure (HF) refers to a complex clinical syndrome, which affects millions of people all over the world. Currently, research suggests optimizing guideline-directed medical therapy to reduce the risk of death and hospitalization due to HF. However, there remains several knowledge gaps concerning which interventions and cares contribute to the better management of HF. Given the circumstances, we would like to organize a Special Issue entitled “Better Management of Heart Failure: Contemporary Strategy and Future Perspective” in *Journal of Clinical Medicine*, to invite original clinical research, meta-analyses, and state-of-the-art reviews related to diagnostics and therapeutics in the whole spectrum of heart failure and related medical issues. We welcome your submissions to advance the field of HF.

Keywords

- heart failure (HF)
- diagnosis
- risk prediction
- guideline-directed medical therapy
- intervention
- better management
- prognosis

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
