Cancer Management in the Era of Immunotherapy

Message from the Guest Editor

A new era of cancer treatment has seen the light in the last decade, following the introduction of checkpoint inhibitors in clinical practice. Along the unprecedented results obtained in various cancer types, immunotherapy has unveiled new challenges and opportunities for all medical disciplines implicated in the process of patient management. The next frontier relies on combination therapies, implementing “old” tools with “new” tricks in order to boost the best of anticancer mechanisms available, although sometimes at the expense of heavier side effects. Will the scientific community be able to overcome challenges and optimize cancer treatment? The future remains a mystery for anyone in this world, although proper acknowledgment of current standards of cancer management in the era of immunotherapy and an insight into perspectives of clinical research can be of help. The latter represent the aims of this Special Issue in the *Journal of Clinical Medicine*, focusing on “Cancer Management in the Era of Immunotherapy”.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
