Chronic Heart Failure: Diagnosis and Management beyond LVEF Classification

Message from the Guest Editors

Data suggest that the incidence of heart failure (HF) is mostly flat or declining but that mortality and hospitalization rates remains virtually unabated despite significant ongoing efforts to manage HF. These disturbing trends reflect the complexity of the HF syndrome and the insufficient mechanistic understanding of its various manifestations and presentations. Further, classification and management, of HF has been based on the left ventricular ejection fraction (LVEF), which has emerged as the reigning dogma based on the practicalities of clinical trial design and may be too simplistic for a multifaceted and complex syndrome, such as HF. In this Special Issue of JCM, we seek clinical and experimental studies with emphasis on HF diagnosis, pathogenesis, and management, including advanced HF. Both original research papers and comprehensive review papers are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
