

## Special Issue

# Clinical Research Advances in Age-Related Macular Degeneration

### Message from the Guest Editor

Age-related macular degeneration is one of the main causes of visual impairment today. Ongoing research in the field aims to better clarify the multifactorial mechanisms involved in the pathogenesis of the disease and improve treatment strategies. Novel imaging methods such as near-infrared reflectance, enhanced depth imaging, and spectral domain optical coherence angiography have given new insight to both retinal and choroidal alterations in age-related macular degeneration, but further research is warranted. A major aim of current research is the search for retinal and choroidal biomarkers that can facilitate clinical assessment, improve diagnosis and inform on factors involved in disease progression with the ultimate aim to refine management strategies. This Special Issue is focused on clinical research advances in age-related macular degeneration. Potential topics include but are not limited to the following: multimodal imaging of the retina and choroid, identification of biomarkers for improved classification, prediction of progression of disease, and management strategies.

### Guest Editor

Prof. Dr. Solmaz Abdolrahimzadeh

Ophthalmology Unit, Department of Neurosciences, Mental Health and Sense Organs (NEMOS), Faculty of Medicine and Psychology, University of Rome Sapienza, St. Andrea Hospital, Via di Grottarossa 1035/1039, 00189 Rome, Italy

### Deadline for manuscript submissions

closed (15 May 2022)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
