Clinical Update of Long COVID

Message from the Guest Editor

Long COVID, also known as post-acute sequelae of SARS-CoV-2 infection (PASC) or chronic COVID-19 syndrome, refers to a condition where individuals experience lingering symptoms and health issues well beyond the typical recovery period from acute COVID-19. While most people infected with COVID-19 experience mild to moderate symptoms and recover within a few weeks, a significant portion of patients, even including those who initially had mild cases, continue to experience persistent symptoms for months. The symptoms of long COVID can vary widely and may include fatigue, shortness of breath, brain fog, joint pain, chest pain, headaches, heart palpitations, loss of taste or smell, and difficulty concentrating. These symptoms can significantly impact the quality of life and daily functioning of those affected. The exact cause of long COVID is not yet fully understood, and research is ongoing to allow us to comprehend the underlying mechanisms better. The management of long COVID often involves a multidisciplinary approach, with healthcare providers addressing specific symptoms and offering supportive care based on individual needs...

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
