Advances in the Diagnosis and Treatment of Coronary Artery Disease

Message from the Guest Editor

Coronary artery disease (CAD) is one of the most common causes of death worldwide in both men and women. There has been significant progress in the field of CAD from diagnosis to therapy, resulting in improved cardiovascular outcomes. The goal of this Special Issue is to update the practicing clinician on the current strategies for diagnosis and treatment and the most recent advances in the field of coronary artery diseases. To this end, we would like to invite state-of-the-art reviews, editorials, and original research in this area for inclusion in this Special Issue. We look forward to your submissions!

Guest Editor

Dr. Alberto Polimeni

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
