Clinical Management of Migraine

Message from the Guest Editor

Migraine is a polygenic, dysautonomic, and chronic neurological condition marked by a "lower threshold of neuronal hyper-excitability", known as "the migrainous brain", with distinctive periodicity. Migraine is divided into migraine with aura (MA) and migraine without aura (MO). There is no cure for migraines, but several acute and preventive treatments are available to help mitigate the symptoms. At present, some drugs are used clinically to reduce the frequency and severity of migraine attacks, such as Analgesics, Triptans, CGRP receptor antagonists, etc. Acupuncture and feverfew are alternative therapies to relieve migraines. Devices and surgery are options for those who show no improvement with medication. However, migraine treatment is often limited by insufficient therapy response, leading to the need for individually adjusted medication. This Special Issue aims to provide an overview of the recent advances in the field of migraines. Therefore, researchers in this field are encouraged to submit original articles, reviews, and commentaries to this Special Issue (case reports and short reviews are not accepted).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
