

## Special Issue

# Latest Advances in Endoscopic Imaging and Therapy—Part I

### Message from the Guest Editor

Recently, research on narrow-band imaging has reported benefits regarding the accuracy and reproducibility of endoscopic diagnosis for gastrointestinal tumors and premalignant lesions. Available image-enhanced endoscopy techniques include blue laser imaging, linked color imaging, dual red imaging, and infra-red imaging. The latest advances in imaging modalities in GI endoscopy have mainly been associated with the development of artificial intelligence, and computer-aided diagnosis is garnering increased investigation. On the other hand, endoscopists should bear in mind that a combination of AI harness power and hyperspectral imaging methods is required. Using secure diagnostic modalities, endoscopic submucosal dissection for diverse GI tumors could be standardized, and its applications compartmenting peroral endoscopic tumor resections and en bloc full-layer thickness resection are emerging. This Special Issue aims to disseminate knowledge on how endoscopic imaging is being developed to provide readers with a view of the future of diagnostic luminal endoscopy and present the latest advancements in endoluminal therapeutic techniques.

### Guest Editor

Prof. Dr. Hajime Isomoto

Division of Gastroenterology and Nephrology, Department of Multidisciplinary Internal Medicine, Faculty of Medicine, Tottori University, Yonago, Japan

### Deadline for manuscript submissions

closed (20 April 2022)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
