Epidemiology and Clinical Characteristics of COVID-19

Message from the Guest Editor

The severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), which causes the corona virus disease 2019 (COVID-19), has spread worldwide since December 2019. Since the first detection, more than 430 million cases have been reported worldwide. To date, five variants of concern of SARS-CoV-2 have been reported, with the Omicron variant being the predominant variant since its first description in November 2021. Of note, COVID-19 caused almost 6 million deaths all over the world. Risk factors for mortality from COVID-19 include older age, male gender, and comorbidities (such as obesity, hypertension, cardiovascular disease, or chronic pulmonary disease). COVID-19 may present as mild respiratory disease, but may progress to acute respiratory distress syndrome, ultimately requiring mechanical ventilation or extracorporeal support. The scope of this Special Issue is to provide an overview of the epidemiology and clinical characteristics of COVID-19. Therefore, researchers in the field of COVID-19 are encouraged to submit an original research article or review to this Special Issue. The deadline for submissions is 20 October 2022.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
