Hepatobiliary and Pancreatic Cancers: Novel Strategies of Diagnosis and Treatments

Message from the Guest Editors

Hepatobiliary and pancreatic cancers represent two of the deadliest malignancies. The aggressive behavior of the diseases and the often-advanced stages at the moments of diagnosis are the main causes for the high mortality rate of these patients. However, in recent years, several advances have been made in the management of this family of diseases. The improvement of surgical techniques, more targeted chemo- and radiotherapy, and radiological and endoscopic techniques are at the core of the research in the hepatobiliary and pancreatic field.

Multidisciplinary approaches represent one of the most powerful weapons against this group of diseases. In fact, the adoption of this type of approach makes it possible to adopt increasingly advanced and complex strategies that allow obtaining increasingly encouraging results. You are kindly invited to share your knowledge, perspectives, and recent advances in the management of hepatobiliary and pancreatic malignancies in this Special Issue of the *Journal of Clinical Medicine*.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
