Hypertension and Cardiovascular Disease: Pathology, Clinical Advances and Current Management

Message from the Guest Editor

Hypertension and related Cv diseases represent a major issue in the management of patients with CV disease. Current management of patients with arterial hypertension is facing new challenges with the introduction of new technology and telemedicine approach for better prediction of CV disease. Blood pressure control and measurements are also facing a rapid increase in technologies with the development of cuffless methods and telemonitoring. Our special issue will focus on Pathophysiology, Clinical Advances and Current Management of cardiovascular disease with a particular focus on hypertension and related CV disorders. *Please click [here](#) to find information!
