

Special Issue

Clinical Applications of Immersive and Nonimmersive Virtual Reality

Message from the Guest Editors

In recent decades, new technologies such as immersive and non-immersive virtual reality have begun to be used as a new tool for scientific research in different fields, including neuroscience, psychology, medicine, neurorehabilitation, and sport rehabilitation, opening novel ways for implementing innovative rehabilitation treatments and clinical applications. The first evidence in this regard shows promising results in many fields, ranging from motor and cognitive exercises for rehabilitation to VR-based application for reducing anxiety and specific phobias. However, despite the many efforts so far, a clear comprehension of the possible applications of immersive and non-immersive VR in clinical and medical fields is still far from being achieved. This Special Issue of the *Journal of Clinical Medicine* aims to collect works that shed new light into the use of VR technologies for clinical and medical applications in order to provide novel evidence that could be useful for future development.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
