Type 2 Diabetes: Epidemiology and Clinical Advances

Message from the Guest Editor

During the last decade, advances in the treatment of type 2 diabetes, the most frequent type of diabetes, have been spectacular. The introduction and widespread use of glucose-lowering drugs with cardiovascular benefits are expected to modify the history of diabetes. However, disparities in the prevalence of diabetes or the occurrence of its complications still exist and as the prevention and treatment of cardiovascular complications improve, other complications will come to the fore. This includes diabetic foot ulcers, vascular dementia, periodontitis and some cancers. The main aim of this Special Issue is to provide an update on the changing epidemiology of diabetes and its complications and the impact of the newer glucose-lowering drugs on the natural history of diabetes and its complications. Papers about persistent disparities in the prevalence of diabetes and complications and those about the less studied complications (peripheral artery disease, diabetic foot ulcers, vascular dementia, chronic periodontitis, cancer and infections) are most welcomed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
