

Special Issue

Migraine and Headache: Clinical Presentation, Treatment, and Management

Message from the Guest Editors

Dear colleagues, This Special Issue will focus on non-headache presentations of migraine. Rather than headache characteristics, we wish to focus on premonitory phases, different presentations of aura, triggers, comorbidities, and differential diagnostic gaps in clinical practice. We will propose the importance of holistic approaches and low-budget solutions, taking into account realities from all over the world.

Additionally, we will discuss the roles of new realistic techniques of lifestyle regulation and non-pharmacological therapies. Finally, we wish to open some windows about management gaps in perspective and age–gender–cultural differentiation. We also wish to discuss the importance of refractory cases that require additional interventional therapies, as well as providing some brief reports on them. We are inviting you to share your evidence-based data with us in order to improve our overall daily headache practice. Please do not hesitate to contact us at any step. *For more information, please click [here](#).*

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
