Balance and Gait in Patients with Parkinson's Disease

Message from the Guest Editor

Gait disturbance and postural instability have been challenging issues in the management of patients with Parkinson's disease (PD). Balance and gait are strongly related to quality of life and prognosis in PD; however, exact pathophysiology and treatment is unknown. With technical development, objective measurement and assessing of balance and gait is possible. Accordingly, many researchers have been very interested in this field in recent years. This Special Issue will collect the work of researchers who study balance and gait in PD. The aim of this Special Issue is to provide updated information on advanced technology for diagnosis, pharmacological and non-pharmacological approaches, and the pathophysiology of balance and gait in PD. We also welcome neuroimaging studies investigating the mechanism of balance and gait in PD.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
