

Special Issue

Current Trends in Hip Surgery

Message from the Guest Editors

We are proud to announce a call for papers on the current techniques in hip surgery. This issue is devoted to all orthopedic surgeons treating hip disorders at any age. Great emphasis will be given to newer techniques of total hip arthroplasty surgery in terms of biomaterials, long-term results, complications, surgical approaches, and newer technologies. Moreover, our aim is to promote the role of non-arthroplasty/preservative surgery in pediatric, young adult, and active patients and outline how these techniques can improve the quality of life of our patients. *J. Clin. Med.* Two out of three case reports and surgical techniques on isolated cases are beyond the scope of this supplement. Selected manuscripts on orthopedic oncology will be considered and included.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
