

Special Issue

Neuroimaging in 2024 and Beyond

Message from the Guest Editors

In recent decades, neuroradiology has made indescribable progress and progressively modifying the traditional working methods of neuroradiologists around the world, increasingly implementing precision diagnostics, thanks to which imaging biomarkers of disease and responses to treatments can be identified. Alongside precision diagnostics, interventional neuroradiology methods have also been developed in the endovascular and spinal fields that have radically changed the healthcare management of many neurological and neurosurgical pathologies. Furthermore, there is growing momentum behind leveraging artificial intelligence techniques to improve workflows, diagnosis, and treatment, and to enhance the value of quantitative imaging techniques. We invite authors to submit articles on technological advances and innovations in diagnostic and interventional neuroradiology for this Special Issue, in order to better understand what can be identified as neuroimaging biomarkers capable of developing a precision diagnostic and therapeutic approach. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
