Shoulder Arthroplasty: State of the Art and Future Perspectives

Message from the Guest Editors

Medical practice and the field of shoulder arthroplasty in particular are moving toward precision medicine. Novel implant designs, configurations, and combinations are constantly emerging in an increasingly aging population. However, direct comparison of implants and clinical outcomes is often challenging. Consequently, the field of shoulder joint replacement urgently requires additional studies on safety, patient satisfaction, cost-effectiveness, and optimal ways to maximize functional recovery and to minimize complications and revision rates. Among the pertinent practical open questions in reverse shoulder arthroplasty (RSA) are the benefits of lateralization and subscapularis refixation, optimal humeral inclination, and the usefulness of preoperative planning software. For anatomic arthroplasty, data are scarce on factors that can contribute to prevention and early detection of glenoid component loosening. The aim of this Special Issue, therefore, is to provide a stage for outstanding clinical, technical, and epidemiological contributions describing recent advances that can lead to improvements of diagnosis, treatment, and prognosis in shoulder arthroplasty.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
