# Advances in Treatment and Management of Chronic Rhinosinusitis

### Message from the Guest Editors

Chronic rhinosinusitis with nasal polyps (CRSwNP) is an inflammatory condition, the most prevalent symptoms of which include nasal obstruction, nasal and postnasal discharge, an abnormal sense of smell, and facial pain. With as much as 4% of the population estimated to be affected, CRSwNP has a significant impact on quality of life and health due to its high direct and indirect cost to both individuals and society. The pathophysiology remains unclear, and a multifactorial interrelation has been observed between genetic, immunological, environmental and mucoepithelial barrier (microbiota) aspects, which determine the existence of multiple phenotypes and endotypes in chronic rhinosinusitis. In those patients whose symptoms cannot be clinically controlled with appropriate medical therapy, endoscopic sinus surgery (ESS) provides a beneficial alternative treatment. Notably, extensive ESS approaches are associated with favourable surgical outcomes and improved quality of life (QoL), in addition to lower relapse rates. Please click [here](#) for more information.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
