

Special Issue

Latest Advances in Urinary Incontinence

Message from the Guest Editors

As you know, urinary incontinence is a very prevalent condition in the worldwide population, associated with a detrimental impact on patients' quality of life and high costs for society. The diagnostic work-up and the management have evolved significantly and the availability of many therapeutic modalities has increased the complexity of the decision-making process, requiring continuous updating by healthcare professionals and patient involvement. For these reasons, we aimed to publish a Special Issue to collect high-quality papers on the latest and most innovative advances in physiopathology, diagnosis, management, and prevention of urinary incontinence. All researchers are invited to contribute original works and reviews (animal research, case reports and short reviews are not accepted). We look forward to receiving your valuable contribution!

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
