Urticaria: Clinical Updates on the Cause, Diagnosis, and Treatment

Message from the Guest Editor

Urticaria is a disorder that still causes many problems in general, allergological, and dermatological practice. Its pathophysiology includes genetic, hormonal, and inflammatory abnormalities. The symptoms of urticaria are undoubtedly the cause of distress for patients, having a detrimental influence on patients' quality of life and resulting in emotional disturbances. Previous analyses proved significant psychological and psychiatric comorbidity in the course of urticaria. Accompanying pruritus often disturbs the sleep cycle. Recurrent angioedema, often coexisting with wheals, is an important problem in daily practice and emergency medicine and one of the most important symptoms of urticaria. In this Special Issue, we will focus on innovations and advancements in urticaria pathogenesis and management, and we hope to provide more information that will be useful for daily practice and future research.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
