

Special Issue

Pulmonary Embolism and Its Complications: Causes, Diagnosis and Treatment

Message from the Guest Editor

Acute pulmonary embolism (PE) is caused by the abrupt occlusion of pulmonary arteries from thrombus formed in the venous system. PE is one of the most frequent acute cardiovascular syndromes and its incidence continues to rise worldwide. Along with symptoms of dyspnea and chest pain, if there is significant thrombus burden, right ventricular strain can result with the potential for cardio-pulmonary collapse. Besides the risk of death, venous thromboembolism (VTE) recurrence, the occurrence of the post-PE syndrome, and PE-related quality of life/functional status are further outcomes that matter to patients with PE. This Special Issue of the *Journal of Clinical Medicine* aims to report the latest research on pulmonary embolism and its complications. We aim to attract original research articles, reviews, and communications on the latest updates in pulmonary embolism and its complications, to improve clinical outcomes and ensure optimal short- and long-term management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
