

Special Issue

Thoracic Surgery: State of the Art and Future Directions

Message from the Guest Editors

In this Special Issue, we aim to bring together a prestigious panel of experts to cover all aspects of thoracic surgery practice, encompassing both benign and malignant pathologies. Our experts will share their insight into the latest research into thoracic surgery, addressing areas of uncertainty and highlighting the latest evidence-based practice. This Special Issue aims to be seen as an annual update for busy thoracic surgeons, residents, and fellows who do not attend meetings regularly. The articles are structured in an easy-to-follow style and give practical “take-home messages” to guide and improve current surgical practice. We hope you enjoy reading this Special Issue.

Guest Editors

Prof. Dr. Ugo Cioffi

Department of Surgery, University of Milan, 20122 Milano, Italy

Dr. Marco Scarci

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
