Clinical Advances in Aortic Surgery

Message from the Guest Editors

Aortic surgery has become one of the most rapidly evolving fields in cardiac surgery. Improved imaging modalities with high-resolution 4D MRI and ultra-sharp cardiac CT have joined forces with novel surgical strategies, including hybrid and complex custom-made endo- prosthetic approaches, to tackle the aortic disease burden. Tremendous surgical progress has led aortic surgery to become a lower risk intervention, allowing aortic arch surgery to be performed with continuous cerebral perfusion in normo- and mild hypothermia. The perioperative monitoring of evoked potentials reduces peripheral and visceral ischemia injuries and facilitates cerebral surveillance strategies during and rapidly after surgery. Fast-track protocols have recently been implemented in complex aortic operations, allowing earlier extubation and neuroradiological intervention in case of need. Finally, multimodal preoperative planning in dedicated aortic teams has been paired with fit-for-surgery pre-operative patients within training programs in order to further improve surgical outcomes. Your contributions in aortic surgery will promote clinical outcomes after aortic surgery beyond major breakthroughs.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
