Intracerebral Hemorrhage: Advances in Preclinical Approaches, Diagnoses and Treatment

Message from the Guest Editors

It is my great pleasure to introduce you to all the exciting Special Issue on "Intracerebral Hemorrhage: Advances in Preclinical Approaches, Diagnoses and Treatment".

Each year, intracerebral hemorrhage (ICH) occupies >10% of the approximate 17 million strokes globally, this stroke subtype having a mortality rate of over 40% and leaving lasting disabilities in the majority of surviving patients; thus, representing a significant public health challenge. Therapeutic developments aim to limit secondary injury by modulating the acute immune response to hemorrhagic strokes by limiting harmful processes and leveraging endogenous protective pathways; therefore, the future of ICH therapy must focus on the delivery of medical and surgical therapies as soon as possible if we are to improve outcomes. This Special Issue "Intracerebral Hemorrhage: Advances in Preclinical Approaches, Diagnoses and Treatment" aims to curate the latest advances in preclinical studies and management approaches regarding this disease, welcoming the submission of review articles as well as original research papers dealing with the topics in the management, diagnoses, and therapy of ICH.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
