Recent Research in Skeletal Diseases

Message from the Guest Editors

Humans can move, walk, run, work and play because our musculoskeletal system works. However, once the system breaks down, not only our activity but also our quality-of-life can deteriorate significantly. A number of skeletal disorders such as osteoporosis, fracture, bone cancers, and osteoarthritis negatively affect the skeletal system. In addition, other bone diseases, which are caused by poor nutrition, genetics, or problems with the rate of bone growth or rebuilding can also greatly damage the system. As a result, all these diseases shorten the healthy life expectancy of human which quantifies the number of years expected to be lived in good health. To overcome this problem, researchers in the field of skeletal diseases are encouraged to submit an original article or review to this Special Issue (case reports and short reviews are not accepted). Especially, we are welcome to have a research regarding to the impact of skeletal disease on quality-of-life and/or healthy life expectancy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
