

Special Issue

The Latest Trends in Exercise Therapy and Sports Injury Rehabilitation

Message from the Guest Editor

The purpose of this Special Issue is to highlight new insights, novel therapeutic approaches and current challenges in exercise therapy and sports injury rehabilitation. While exercise activity is associated with numerous beneficial effects on human health, it can also lead to acute or overuse injuries. With more people practising sports at high intensities throughout their lifespan, the number of sports injuries is increasing. In addition, sports injuries are not exclusively caused by mechanical overload but that metabolic and/or hormonal disturbances facilitate the development of certain injuries. As a consequence, multidimensional and interdisciplinary therapeutic approaches need to be developed which consider multiple influencing factors beyond the injured tissues mechanical stability. Furthermore, current therapeutic practises and assumptions need to be scrutinised, and evidence for the effectiveness of treatments needs to be provided. This Special Issue aims, to combine latest research in the field of sports injury rehabilitation, to shed light on the progress made and the challenges identified, and to provide an overview on novel evidence-based therapeutic approaches.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
