Recent Advances in Thyroid Cancer

Message from the Guest Editor

The diagnostic tools, risk stratification modalities, and treatment options for patients with thyroid cancer have rapidly evolved. As far as diagnostic advancements are concerned, molecular tests have been developed, aim to reduce the avoidable treatment of benign nodules, or 'rule-in' tests that have the purpose to optimize surgical management. Regarding initial treatment, current debates include undertaking active surveillance versus thyroid surgery for papillary thyroid microcarcinoma, the extent of thyroid surgery and lymphadenectomy for low-risk differentiated thyroid cancer, and the selection of cases for whom radioiodine residue ablation is still indicated, with the final aim to avoid over-treatment in low-risk disease and under-treatment in high-risk disease. Finally, among novel patient-tailored therapies for advanced thyroid cancers, tyrosine kinase inhibitors, selective inhibitors and immunotherapeutic agents are currently in use or in trial stages. The present Special Issue will explore new diagnostic and therapeutic approaches developed in the last few years for the most appropriate management of thyroid cancer.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
