

## Special Issue

# Biomedical Composites: Material Science and Corrosion Resistance Aspects, Volume II

### Message from the Guest Editors

The aim of the Special Issue on “Biomedical Composites: Material Science and Corrosion Resistance Aspects” is to collect high-quality papers and reviews on the theoretical and experimental study of composite biomedical materials evidencing recent progresses in material science and electrochemical biocorrosion aspects. The use of composite biomaterials is finalized to solve the constraints of single materials by highlighting their functionality in the human body environment. All research groups with different backgrounds working in this area are invited to propose to the Special Issue the development of their research on all types of biomedical composite materials with both theoretical and experimental approaches. Potential topics include but are not limited to:

- Synthesis of composites for biomedical applications;
- Composite coatings with improved biocorrosion resistance;
- Physicochemical, electrochemical, mechanical, tribological, biological, structural and functional characterization of biomedical composites;
- Theoretical modeling of the synthesis processes or the functioning of composite biomaterials in the human body.

---

### Guest Editors

Prof. Dr. Patrizia Bocchetta

Department of Engineering for Innovation, University of Salento, 73100 Lecce, Italy

Dr. Meenal Gupta

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Francesco Tornabene

Department of Innovation Engineering, University of Salento, 73100  
Lecce, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1  
(Engineering (miscellaneous))
