

Special Issue

Mechanical Behaviour of Composite Materials for Biomedical Applications

Message from the Guest Editors

The 3D print technology is expanding daily, and when it is used in the medical industry, it has excellent potential to help prolong and save lives. For instance, it's possible to reproduce customized organs and prosthetics for patients. Hence, these printed objects can be used for research and the development of prototypes. There are also 3d printer prostheses in orthodontics and dentistry. All these trends are expected to grow in the following years and beyond. Hence, this special issue intends to contribute to the publication of reports containing interchangeable original and substantial findings wherein the mechanical behavior of “new materials” is used to explore biological problems.

Guest Editors

Dr.  Maria Augusta Neto

Mechanical Engineering Department, University of Coimbra, 3030-788 Coimbra, Portugal

Prof. Dr. Ana Paula Piedade

Department of Mechanical Engineering, University of Coimbra, 3030-788 Coimbra, Portugal

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Francesco Tornabene
Department of Innovation Engineering, University of Salento, 73100
Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
