

## Special Issue

# Composites for Energy Storage Applications, Volume II

### Message from the Guest Editor

Energy storage systems are becoming crucial for using renewable energies in buildings and industry, in order to reduce the mismatching between solar energy supply and demand. In addition, this technology also reduces greenhouse gas emissions. Nevertheless, to build an efficient energy storage system, a high-performing material is necessary. In such a scenario, research studies on materials for thermal storage are a high priority. Composite materials seem to be good candidates for assuring high storage capacities per mass or volume. The aim of this Special Issue is to collect the best papers on the development, improvement, and enhancement of composite materials for energy storage.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Francesco Tornabene  
Department of Innovation Engineering, University of Salento, 73100  
Lecce, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
