

Special Issue

Functional Biomaterials and Digital Technologies in Dentistry: From Bench to Bedside—2nd Edition

Message from the Guest Editors

To date, various functional biomaterials have been developed and proposed for oral and maxillofacial applications, due to their excellent biocompatibility, superior mechanical properties, and proper biofunctionality. In addition, advancements in digital technologies for biomaterials have attracted increasing attention. However, the translation process of functional biomaterials and digital technologies from bench to clinic remains extremely challenging. This Special Issue aims to provide insight into the recent advances in functional biomaterials and digital technologies. It intends to explore opportunities for basic research, dental education, and the clinical application of biomaterials and digital technologies. The main topics include but are not limited to, the following: advanced functional biomaterials (metals, ceramics, polymers, and composites) and digital technologies (CAD/CAM milling, 3D printing, bioprinting, 4D printing, and artificial intelligence) in dental applications. We invite you to submit a manuscript and present your recent research articles, reviews and communications that reveal the current state of the art and future trends in this field.

About the Journal

Message from the Editor-in-Chief

The biomaterials field is one of the largest and fastest growing research areas both in the scientific community and in the industrial one. Biomaterials are the result of collaborations between different disciplines: chemistry, medicine, pharmacology, engineering and biology. The objective of this collaboration is to lead to the implementation of new devices to restore form and human body functions. The mission of the *Journal of Functional Biomaterials (JFB)* is to focus attention on physico-chemical characteristics and their importance in the interactions between biomaterials and living tissues. *JFB* seeks to publish studies on the preparation, performance and use of biomaterials in biomedical devices, as well as regarding their behavior in physiological environments. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Pankaj Vadgama

School of Engineering and Materials Science, Queen Mary University of London, London, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Biomedical) / CiteScore - Q2 (Biomedical Engineering)
