

## Special Issue

# Advances in Material Forming

### Message from the Guest Editors

We are inviting you to submit your research for this Special Issue of the *Journal of Manufacturing and Materials Processing* published by MDPI on “Advances in Material Forming”. Recent advances in materials such as advanced high-strength steel, higher grades of aluminum, and Inconel alloys is directing current research trends toward more efficient and cost-effective novel manufacturing. In addition, the automotive and aerospace industries are driving the need for lightweight parts. This is leading to new platforms for manufacturing processes i.e., non-traditional approaches to manufacture and form the parts. There are challenges to deforming high-strength materials using these non-traditional approaches which result in different stress states compared to conventional processes and characterization of these materials. Therefore, there is a significant need for experimentation, analysis, and simulation to formulate and evaluate theories for addressing these new processes and materials. For further reading, please visit the website at [mdpi.com/journal/jmmp/special\\_issues/material\\_forming](https://mdpi.com/journal/jmmp/special_issues/material_forming).

### Guest Editors

Prof. Dr. Chetan P. Nikhare

Advanced Manufacturing and Innovation Center, Mechanical Engineering Department, The Pennsylvania State University, Erie, PA 16510, USA

Dr. William J. Emblom

Mechanical Engineering, University of Louisiana at Lafayette, Lafayette, LA 70503, USA

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Manufacturing and Materials Processing (JMMP)* (ISSN 2504-4494) is a new MDPI peer-reviewed, open access venue with a focus on the scientific fundamentals and engineering methodologies of manufacturing and materials processing. We offer an online platform facilitating effective exchange of innovative scientific and engineering ideas and the dissemination of recent, original, and significant research and developmental findings. On behalf of the Editorial Board, I extend an invitation to our scientific and engineering colleagues to contribute high-quality, innovative, and ground-breaking research articles to *JMMP*.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec,  
CAPlus / SciFinder, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q1 (Engineering, Mechanical) / CiteScore - Q2  
(Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.7 days after  
submission; acceptance to publication is undertaken in 2.8  
days (median values for papers published in this journal in  
the first half of 2024).
