

## Special Issue

# Molecular Pathology of Bladder Cancer

### Message from the Guest Editor

Bladder cancer has trailed behind other malignancies in the routine application of molecular diagnostics. Whilst urine cytology has a high specificity for high grade lesions, the more common low grade lesions are reliant on cystoscopy for diagnosis and follow up. Any biomarkers that increase the yield of low (and high) grade lesions would increase in the interval between cystoscopies and focus clinical management of those patients most at risk from progressive bladder cancer. It is time to shortlist some of the most promising candidates in this long-running race for the best biomarker. We invite investigators to contribute original research articles as well as review articles and communications.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Giancarlo Troncone  
Department of Public Health, University of Naples Federico II, 80131  
Naples, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPIus / SciFinder, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.5 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2024).
