## Biodiversity of Marine Fishes

### Message from the Guest Editors

According to a recent report by the Intergovernmental Science-Policy platform on biodiversity and ecosystem services, one in five people in the world depend on wild species for sustenance and income, with fisheries being the main source of food from wild species. Thus, the conservation of these resources through their sustainable management is more important than ever to achieve the UN Sustainable Development Goals. We welcome research papers, reviews, and contributions on various aspects of marine fish biodiversity, including, but not limited to, the following:

- Taxonomy and systematics;
- Distribution patterns;
- Conservation and management;
- Adaptations and behavior;
- Genetic diversity;
- Climate change impacts;
- Anthropogenic threats.

---

### Guest Editors

Dr. Violin Raykov

Prof. Dr. Jose Pedro Andrade

Dr. Pasquale Ricci

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Civil and Structural Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
