Marine Industry and Regional Development – Maritime Roadmap Up to the Future

Message from the Guest Editors

Maritime transport is one of the most important marine industries that play a prominent role in the socio-economic development of most coastal regions all over the world. Shipping undertakes more than 70% of international trade and provides huge promotions to regional and global economies. On the other side, as the important nodes in logistics networks, ports behave as the crucial engines for regional economies and social development. In recent decades, there has been rapid progress in the maritime industry in terms of new technologies, ideas, approaches and operation modes. Meanwhile, some global issues, e.g., climate change, the COVID-19 pandemic and the world economy recession, propose more challenges to the sustainability of the maritime industry. In order to better understand the interactions between the maritime industry and regional development in the new dynamic environment, it is necessary to place more attention on the related research topics.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

Oceans Graduate School and The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Civil and Structural Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
