

# Special Issue

## Deep-Sea Fish and Fisheries

### Message from the Guest Editors

Deep-sea fishes are a very diverse group of chondrichthyans and teleosts widely distributed in the world's oceans from the Arctic to Antarctic and inhabiting the water column and seabed of continental slopes, seamounts and high seas at depths greater 400 m. Despite the long period of studies of deep-sea fishes and commercial exploitation of their resources, their importance in the ecosystems is still poorly understood. Our knowledge of their taxonomy, zoogeography, evolution, phylogeny, basic biological traits, and conservation needs remain scarce. This Special Issue will provide an overview of the current status of knowledge on the variety of topics related to deep-sea fish and fisheries, including taxonomy, zoogeography, phylogeny, molecular biology, evolution, life history, role in the ecosystem, conservation, stock assessment, fisheries and management worldwide. The present Special Issue will comprise collected papers, the majority of which provide new or previously unpublished data. This collection will give readers the opportunity to find a lot of useful information on deep-sea fish and fisheries in a single reference.

---

### Guest Editors

Dr. Alexei M. Orlov

P.P. Shirshov Institute of Oceanology of the Russian Academy of Sciences (IO RAS), Moscow, Russia

Dr. Michael Maia Mincarone

Institute of Biodiversity and Sustainability, Universidade Federal do Rio de Janeiro, Rio de Janeiro, Brazil

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Civil and Structural Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
