

Special Issue

Environmental Footprint of Shipping—Characteristics and Mitigation Strategies

Message from the Guest Editors

Maritime shipping is the main transport mode for global trade. In recent decades, the size and the number of maritime freights, which largely rely on the use of diesel engines, have largely expanded due to the world economy. These are very energy efficient but have non-negligible environmental impacts. While new options for marine propulsion are arising, most of the ships in operation for the next thirty years will be still based on internal combustion engines, fueled with conventional bunker oils or new fuels. This Special Issue welcomes papers related to the characteristics of ships' pollutant emissions and the control strategies for their reduction. In particular, contributions should focus on: i) the characterization of ships' emissions and their impact on health and the environment either at the regional or global scale, ii) innovative technologies and case studies on the mitigation of ships' emissions into air and seawater, and iii) new environmental policies (e.g., fuel quality), finance aspects, directives and their future perspectives for maritime shipping.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

Oceans Graduate School and The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Civil and Structural Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
