

Special Issue

Modern Technologies and Methods of Development for the Maritime Industry

Message from the Guest Editor

The term maritime refers to almost everything connected to the sea or waterways throughout the world, especially in relation to navigation, shipping and marine engineering. The industry has a direct impact on much of our everyday lives. The issues of navigation, pilotage and decision making are considered. This Special Issue is also devoted to the thematic area of automation systems and information systems for the maritime industry. Recently, this area of study has been changing very rapidly and there are many implementations in the technological and general cycles. The development of the industry requires research in various fields of engineering, such as robotics, automation, neural networks and ecology, among others. This research will significantly contribute to the development of the maritime industry as a whole. The Special Issue will be interesting to both professionals and ordinary readers who research in and are interested in the maritime industry.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

Oceans Graduate School and The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Civil and Structural Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
