

Special Issue

Novel Techno-Economic Solutions for Offshore Renewable Energy Systems

Message from the Guest Editors

Dear colleagues, Producing truly reliable offshore renewable energy systems goes beyond overcoming a series of technological challenges, ranging from the conception, design, and operation of new devices with improvements such as stability, redundancy, seakeeping, or survival within the adverse conditions of the marine environment. On the other hand, these technical advances demand to be supported by economic analysis that need to be developed in an accurate manner in order not to compromise the commercial exploitations of these offshore renewable energy technologies. This Special Issue aims to exhibit the latest research achievements, findings, and ideas in order to outline the current state-of-the-art and highlight the emerging trends and challenges. In this Special Issue proposal, potential topics include but are not limited to the following:

- Robotics and control algorithms
- Signal processing
- Offshore renewable energy conversion systems
- Offshore renewable energy resources
- Risk and reliability models
- Lifecycle assessment
- Techno-economic modeling
- Production costs
- Energy strategies
- Business modeling
- Levelized cost of electricity protections

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

Oceans Graduate School and The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Civil and Structural Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
