Special Issue

Fungal Infections in Dermatology 2.0

Message from the Guest Editors

The skin is the largest organ of the body and has a complex structure. It supports body organs and plays an important role in maintaining the immune system. Fungal diseases majorly affect the skin through different mechanisms. Thus, recent resistance to some common antifungal agents has raised concern in relation to the management of these diseases. This Special Issue of the *Journal of Fungi* entitled "Fungal Infections in Dermatology 2.0" aims to present recent research on any aspect of fungal skin diseases. Some focal points may include, but are not limited to, the following:

- Dermatophytes:
- Nail fungus;
- Hair fungus;
- Oral thrush.

Reviews, original research and communications are all welcome.

About the Journal

Message from the Editor-in-Chief

The Journal of Fungi (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin

Hackensack Meridian Health Center for Discovery and Innovation, 111 Ideation Way, Nutley, NJ 07110, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
