

an Open Access Journal by MDPI

Journal of Respiration

A microscopic view of alveoli, showing the intricate, honeycomb-like structure of the lung tissue. The image is rendered in a monochromatic red color scheme, with bright highlights on the alveolar walls and dark shadows in the recesses, creating a textured, three-dimensional appearance.

Message from the Editor-in-Chief

Over the last decade, the amount of information pertaining to thoracic structures has been unprecedented. The thorax is unique in terms of the different structures that involve the respiratory system—lungs, pleura, upper and lower respiratory tract—all located in the mediastinum that by itself represents a different compartment with its own wealth of conditions, and that also includes the Thymic gland. Therefore, we believe that the availability of a new open access journal, *JoR*, dedicated to highlighting and disseminating information related to the respiratory system is not only timely but is also absolutely necessary. As we can see, the information related to the respiratory systems is vast and there could not be anything more and better than to have a journal that is dedicated to the promotion, dissemination, and efficient publication of timely articles on the respiratory system including all its structures.

Editor-in-Chief

Prof. Dr. Cesar A. Moran

Associate Editors

Dr. Cristian Ortiz Villalon

Dr. Mylene Truong

Prof. Dr. David Gozal

Aims

The *Journal of Respiration* is an international, peer-reviewed open access journal dedicated to presenting developments related to the thoracic cavity that may affect the respiratory system in any way. It publishes reviews, research articles, communications, and technical notes, and selected exceptional case reports. Our Editorial Board is composed of physicians and scientists who cover the broad spectrum of specialties within research on the thoracic cavity. In addition, our Editorial Board is committed to upholding the highest possible standards regarding the prompt and unbiased assessment of any information referred to the journal for publication. We are committed to a rapid but accurate review process so that any manuscript submitted to the journal can be published without unnecessary delay.

Scope

The *Journal of Respiration* welcomes manuscripts related to the thoracic cavity, which may affect the respiratory system. The thoracic cavity, in addition to the conventional upper and lower respiratory tract structures, contains the esophagus and the heart, which in some circumstances may affect the respiratory system. Therefore, we welcome manuscripts related to the lung proper (including small and large airway) and the incorporate mediastinum, pleura, chest wall, larynx, and trachea, esophagus, and heart, as components of the thoracic cavity. Furthermore, we are interested in all factors that may affect these anatomical structures, whether related to pathology, diagnostic imaging, anatomical, physiological, histological, oncological, or non-neoplastic processes, occupational health, epidemiology, health education, health promotion, or intensive care; this may include reactive, infectious, or idiopathic conditions, among others. We are also interested in surgical procedures or interventional radiological aspects that may be related to the respiratory system. We are committed to enhancing our understanding of the multiple conditions that may affect the respiratory system, which in turn will expand our knowledge.

If you have a specific idea in mind and want to develop a theme for any topic, please get in contact with the Editor-in-Chief or with Managing Editor. We warmly welcome you and your ideas.

Author Benefits

Open Access

Unlimited and free access for readers

Rapid Publication

A first decision is provided to authors approximately 42.2 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the second half of 2024)

Recognition of Reviewers

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal
