

## Special Issue

# Treatment, Prevention and Multidisciplinary of Respiratory Problems

### Message from the Guest Editors

Personalized medicine (PM) aims to improve efficiency and quality of care, to reduce side effects and to increase long-term control of chronic disease. PM is considered of major interest in different medical domains with the objective to improve the level of disease control, enhance patient satisfaction and increase the effectiveness of preventive interventions. The combination of personalized care, prediction of treatment success, prevention of disease and patient participation in the elaboration of the treatment plan is expected to substantially improve the therapeutic approach for individuals suffering from chronic disabling conditions. The purpose of this Special Issue is to offer readers and colleagues updates on treatments and prevention in the field of respiratory diseases, stressing the crucial role of multidisciplinary. Furthermore, the need for an integrated multidisciplinary approach in the evaluation of respiratory pathologies cannot be overlooked. These are the reasons why I proposed this Special Issue of the *Journal of Personalized Medicine*, to collect papers about the “Treatment, Prevention and Multidisciplinary of Respiratory Problems”.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
