Special Issue

Advances in Personalized Nursing Care

Message from the Guest Editors

The person-centered care model aims to ensure that people's rights, regardless of their age and functionality, are respected. This model considers the person as the centre of the care process, in which personalized care is provided, with the studies reporting positive impacts on both users and health professionals. The purpose of this Special Issue is to provide a comprehensive view relating to the advances in personalized nursing care throughout the lifecycle and in all care settings, such as in intensive care, palliative care, rehabilitation care and in the community. We welcome innovative research in the field of diagnostic assessment and nursing intervention. The findings should have implications for the improvement of personalized nursing care, nursing education, and nursing management, as well as contributing to the construction of education and health policies. Original articles, methodological studies, literature reviews, and metanalyses are welcome. We would like to encourage authors to submit solid research articles/communications or review papers.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. David Alan Rizzieri
1. Novant Health Cancer Institute, Winston-Salem, NC 27103, USA
2. Division of Hematologic Malignancies and Cellular Therapy, Duke University, Durham, NC 27710, USA

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
