

## Special Issue

# New Perspectives of Critical Care Medicine

### Message from the Guest Editor

This Special Issue will focus on articles that are likely to be of wide interest to critical care science and be relevant for the care of critically ill patients. The purpose of our work is to showcase clinical studies, systematic reviews, meta-analyses, reviews about advances in therapies and monitoring, implementation science reports, fundamental science studies and health services research related to critical illness and emergency interventions in hospital. The diversity of topics and article types should also reflect the multidisciplinary approach and be relevant for the practice of critical care medicine and for patients' benefits. The topics could cover the following areas: resuscitation, sepsis, trauma, cardiovascular critical care, biomarkers, point of care ultrasonography, emergency medicine.
