# The Neurobiological Mechanisms Underlying Individual Differences in Addiction

### Message from the Guest Editor

In this Special Issue of the Journal of Personalized Medicine, we aim to assemble biological insights from a broad range of disciplines that provide a better understanding of the neurobiological mechanisms underlying the individual variability that leads to various outcomes in addictive disorders, potentially helping accelerate the advancements in precision medicine and/or precision health for addiction. We welcome the submission of experimental and theoretical original research, reviews, and meta-analyses investigating the neurobiological mechanism of addictive disorders, ranging in scope from preclinical animal models to human studies via behavioral, electrophysiological, imaging, genetic, genomic, and computational approaches.
