

## Special Issue

# Personalized and Targeted Atherosclerosis Treatments

### Message from the Guest Editors

Atherosclerosis affects millions of individuals worldwide, with a third of all deaths of Americans older than 35 being due to coronary artery disease, and stroke ranking 5th among all causes of death in the US. Despite available treatments, patient response rates are limited, and adverse drug reactions are considerable. The technological and scientific advances over recent years are setting the stage for new generations of atherosclerosis treatments that will be personalized and targeted at the cellular and molecular level. This Special Issue will be focusing on new technologies, concepts and strategies currently pursued towards these goals.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q2 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
